

## **Dual citizenship issue should be solved in referendum - Lithuania's president**

VILNIUS, Nov 04, BNS - The decision on boundaries of dual citizenship in Lithuania should be made by way of referendum, Lithuania's President Dalia Grybauskaite said in comment of the law adopted by the parliament on Thursday.

"Such issues should be proposed for the nation to decide by way of referendum, especially if there are questions or doubts regarding their compliance to the Constitution," the president told journalists.

Grybauskaite noted that the parliament also had doubts regarding the new law's adherence to the country's main law, adding that lawmakers intended to take the matter to the Constitutional Court.

The president said she would decide on the possibility to veto the law upon receipt of "full package of documents."
